

YOU COUNT!

Your participation in the 2020 Census is important.

When more Albany residents fill out the 2020 Census, our City will receive more federal money. This money will help educate our children, rebuild our roads, and create jobs and opportunities for our growing, vibrant City.

Reaching 100,000 residents is a major milestone that will unlock important new money for our City. With 97,856 residents as of 2010, Albany is almost there, and YOU could make the difference.

This additional money will help improve and enhance:

- Head Start
- Affordable Housing
- Free School Breakfast & Lunch Programs
- Road Repairs
- Job Opportunities
- Workforce Training

Ignoring the Census could result in funding cuts and weakened federal, state, and local representation. Make sure you are counted to help prevent being undercounted!

Fact 1

The Census Bureau will **never** ask for your social security number, credit card number, bank account information, or any other financial information.

Fact 2

The Census is now easier to complete than ever. You can fill it out online, including at any public library – a more convenient alternative to paper forms and phone surveys.

It is illegal for the Census Bureau to share personal information with:

- Immigration & Customs Enforcement
- Local or State Police
- Local Code Enforcement
- City Assessor
- City School District of Albany
- Internal Revenue Service
- Department of Social Services

Illegal use of the Census information can result in prison sentences and fines.

The City of Albany Complete Count Committee urges you to be counted.
